Award Longlist “As we go
about our daily lives,

caste is the wordless
usher in a darkened
theater, flashlight cast
down in the aisles,
guiding us to our assigned
seats for a performance.
The hierarchy of caste is
not about feelings or
morality. It is about
power—which groups
have it and which do not.”
In this brilliant book,
Isabel Wilkerson gives us
a masterful portrait of an
unseen phenomenon in
America as she explores,
through an immersive,
deeply researched
narrative and stories
about real people, how

America today and
throughout its history has
been shaped by a hidden
caste system, a rigid
hierarchy of human
rankings. Beyond race,
class, or other factors,
there is a powerful caste
system that influences
people’s lives and
behavior and the nation’s
fate. Linking the caste
systems of America, India,
and Nazi Germany,
Wilkerson explores eight
pillars that underlie caste
systems across
civilizations, including
divine will, bloodlines,
stigma, and more. Using

riveting stories about people—including Martin Luther King, Jr., baseball's Satchel Paige, a single father and his toddler son, Wilkerson herself, and many others—she shows the ways that the insidious undertow of caste is experienced every day. She documents how the Nazis studied the racial systems in America to plan their out-cast of the Jews; she discusses why the cruel logic of caste requires that there be a bottom rung for those in the middle to measure

themselves against; she writes about the surprising health costs of caste, in depression and life expectancy, and the effects of this hierarchy on our culture and politics. Finally, she points forward to ways America can move beyond the artificial and destructive separations of human divisions, toward hope in our common humanity. Beautifully written, original, and revealing, *Caste: The Origins of Our Discontents* is an eye-opening story of people and history, and a

reexamination of what lies under the surface of ordinary lives and of American life today. *Connecting with the Past by Brinkley*, Alan McGraw-Hill Education
 "In *The Unfinished Nation*, Alan Brinkley provides a clear and intelligent account of the American past that strikes a balance between the new diversity in scholarship and the narrative unity that any general history must have. He makes clear that one can incorporate the rich and varied experiences of America's

many cultures into a coherent and compelling story and at the same time retain a sense of what ties Americans together as members of a perpetually troubled but remarkably successful nation"--Description from amazon.com.

Historians in Public

Cram101

A supplemental textbook for middle and high school students, Hoosiers and the American Story provides intimate views of individuals and places in Indiana set within themes from American history.

During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological

improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past. [The Origins of Our Discontents](#) HMH This Companion Reader is a bridge between a textbook and living books.

It contains simple articles about cultures, places and events from history in more depth than is found in most textbooks, stories to illustrate themes contained in the Connecting with History units, and short historical stories written in a friendly, conversational style about real people and events.

Connecting With the Past - Ap Edition

McGraw-Hill Education
In recent times, the Asia-Pacific region has far surpassed Europe in terms of reciprocal trade

with the United States, and since the 1980s immigrants from Asia entering the United States have exceeded their counterparts from Europe, reversing a longstanding historical trend and making Asian Americans the country's fastest growing racial group. What does transpacific history look like if the arc of the story is extended to the present? The essays in this volume offer answers to this question challenging current assumptions about transpacific relations.

Many of these assumptions are expressed through fear: that the ascendance of China threatens a U.S.-led world system and undermines domestic economies; that immigrants subvert national unity; and that globalization, for all its transcending of international, cultural, and racial differences, generates its own forms of prejudice and social divisions that reproduce global and national inequalities. The contributors make clear

that these fears associated with, and induced by, pacific integration are not new. Rather, they are the most recent manifestation of international, racial, and cultural conflicts that have driven transpacific relations in its premodern and especially modern iterations. Pacific America differs from other books that are beginning to flesh out the transnational history of the Pacific Ocean in that it is more self-consciously a people's history. While diplomatic and economic

relations are addressed, the chapters are particularly concerned with histories from the "bottom up," including attention to social relations and processes, individual and group agency, racial and cultural perception, and collective memory. These perspectives are embodied in the four sections focusing on China and the early modern world, circuits of migration and trade, racism and imperialism, and the significance of Pacific islands. The last

section on Pacific Islanders avoids a common failing in popular perception that focuses on both sides of the Pacific Ocean while overlooking the many islands in between. The chapters in this section take on one of the key challenges for transpacific history in connecting the migration and imperial histories of the United States, Japan, China, Korea, Vietnam, and other nations, with the history of Oceania. *America's History* Random House

Women in Transnational History offers a range of fresh perspectives on the field of women's history, exploring how cross-border connections and global developments since the nineteenth century have shaped diverse women's lives and the gendered social, cultural, political and economic histories of specific localities. The book is divided into three thematically-organised parts, covering gendered histories of transnational networks, women's agency in the intersecting

histories of imperialisms and nationalisms, and the concept of localizing the global and globalizing the local. Discussing a broad spectrum of topics from the politics of dress in Philippine mission stations in the early twentieth century to the shifting food practices of British women during the Second World War, the chapters bring women to the centre of the writing of new transnational histories. Illustrated with images and figures, this book throws new light on key global themes from

the perspective of women's and gender history. Written by an international team of editors and contributors, it is a valuable and timely resource for students and researchers of both women's history and transnational and global history.

American History:

Connecting with the Past
Lulu Press, Inc

The Jungle is a 1906 novel written by the American journalist and novelist Upton Sinclair (1878–1968). Sinclair wrote the novel to portray

the lives of immigrants in the United States in Chicago and similar industrialized cities. Many readers were most concerned with his exposure of health violations and unsanitary practices in the American meatpacking industry during the early 20th century, based on an investigation he did for a socialist newspaper. The book depicts working class poverty, the lack of social supports, harsh and unpleasant living and working conditions, and a hopelessness among

many workers. These elements are contrasted with the deeply rooted corruption of people in power. A review by the writer Jack London called it, "the Uncle Tom's Cabin of wage slavery." Sinclair was considered a muckraker, or journalist who exposed corruption in government and business. He first published the novel in serial form in 1905 in the Socialist newspaper, Appeal to Reason, between February 25, 1905, and November 4, 1905. In 1904, Sinclair had spent

seven weeks gathering information while working incognito in the meatpacking plants of the Chicago stockyards for the newspaper. It was published as a book on February 26, 1906 by Doubleday and in a subscribers' edition. The Epic Story of the Chinese Who Built the Transcontinental Railroad
 McGraw-Hill Education
 From lagging book sales and shrinking job prospects to concerns over the discipline's "narrowness," myriad factors have been cited by historians as evidence

that their profession is in decline in America. Ian Tyrrell's *Historians in Public* shows that this perceived threat to history is recurrent, exaggerated, and often misunderstood. In fact, history has adapted to and influenced the American public more than people—and often historians—realize. Tyrrell's elegant history of the practice of American history traces debates, beginning shortly after the profession's emergence in American academia, about history's

role in school curricula. He also examines the use of historians in and by the government and whether historians should utilize mass media such as film and radio to influence the general public. As *Historians in Public* shows, the utility of history is a distinctive theme throughout the history of the discipline, as is the attempt to be responsive to public issues among pressure groups. A superb examination of the practice of American history since the turn of the century, *Historians in*

Public uncovers the often tangled ways history-makers make history-both as artisans and as actors.
