#### *How Cities Think: Knowledge Co-Production for Urban ...*

Sustainable water governance requires interdisciplinary knowledge about environmental and social processes as well as participatory strategies that bring scientists, managers, policymakers, and other stakeholders together to cooperatively produce knowledge and solutions, promote social learning, and build enduring institutional capacity.

Co-production of knowledge is a core principle of the new research programme "Future Earth". Three co-existing logics on the purpose and practice of co-production can be distinguished. These logics shape the process of institutionalizing co-production in "Future Earth". Tensions between logics become apparent in the institutional process.

#### **Co-producing Knowledge for Sustainable Cities - Merritt ...**

It is written for academic and professional audiences working with urban planning and sustainable

cities around the world. Co-producing Knowledge is presented, by way of introduction, as a non-linear, collaborative approach to knowledge production which combines interdisciplinary, transdisciplinary, cross sector and policy approaches to societal problem solving. Examples are taken from Cape Town, Gothenburg, Kisumu, Manchester, Melbourne and a selection of cities in Southeast Asia.
